

2008 Forest Pest Management Forum
Dec 2nd - 4th, 2008
Château Cartier
Aylmer, Quebec (7 km from downtown Ottawa)

If you have an interest in forest pest management this is an event you do not want to miss! The location of the Forum may have changed but the excellent presentations have not.

It is the 58th annual Forest Pest Management Forum in our national capital region. The event will be held from December 2nd– 4th, 2007 at the Château Cartier in Aylmer, Quebec.

We have the latest news from experts on invasive alien species that are in Canada and what is happening with native pests such as the Mountain Pine Beetle's march eastward from British Columbia. There will be presentations on forest pathology and the potential impacts of climate change on forest pest management in Canada.

For more information please visit the Forum website at:
